DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/5/2007 has been entered.

Priority

2. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. [1] as follows:

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 09/384,464, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. Support for the newly added recitation of "wherein n

Application/Control Number: 10/774,187

Art Unit: 1773

is an integer from 1 to 5" in claim 1 is only present in Application Nos. 09/698,554 and 10/091,754. Applications No. 09/384,464 and earlier filed Applications only disclose n values ranging from 1 to 3.

Therefore, for the purposes of this Office Action:

Claims 1-7, 12-13 are deemed to have a filing date of 10/27/2000.

Claims 8-11, 14-22 are deemed to have an effective filing date of <u>03/05/1998</u>.

Terminal Disclaimer

- 3. The terminal disclaimer filed on 4/5/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of:
 - (a) U.S. Patent Nos. 6,660,828 has been reviewed and is accepted. The terminal disclaimer has been recorded.
- 4. The terminal disclaimers filed on 6/30/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of:
 - (a) U.S. Patent Nos. 6,686,051 and 6,383,651 and 6,423,418; and
 - (b) patents issuing from copending Application No. 10/966,528 (US 2005/0048213); have been reviewed and is accepted. The terminal disclaimer has been recorded.
- 5. The double patenting rejections based on:
 - (a) U.S. Patent Nos. 6,686,051 and 6,383,651 and 6,423,418 and 6,660,828; and
 - (b) copending Application No. 10/966,528 (US 2005/0048213);

Application/Control Number: 10/774,187

Art Unit: 1773

have been withdrawn in view of the Terminal Disclaimers filed 6/30/2006 and 4/5/2007

Page 4

Claim Rejections - 35 USC § 102

- 6. The rejections under 35 U.S.C. 102(b) of claims 14-22 based on:
 - (a) WEINERT ET AL (US 6,383,651); or
 - (b) CALLICOTT ET AL (US 6,423,418);

have been withdrawn in view of Applicant's amendments filed 4/5/2007 (establishing an effective filing date of 03/05/1998).

7. Claims 1-7, 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by: WO 99/450079 (WO '079).

The above reference discloses curable or cured coatings derived from compositions comprising an amino resin (e.g., alkyl-etherified melamine formaldehyde resin) and a polymer comprising polyester segments and fluorinated polyether segments, wherein the polyether segments are derived from oxetane with pendant fluorinated groups linked to the polyether segments via an ether linkage, substrates coated with said coatings, and methods of forming such coated substrates, wherein the substrate is polyvinyl chloride, the coated substrates are dry erase materials and/or wall coverings, and wherein curing takes place at 150 F or more. (WO '079, see entire document).

Claim Rejections - 35 USC § 103

8. The rejections under 35 U.S.C. 103(a) of claims 14-22 based on:

Art Unit: 1773

(a) WEINERT ET AL (US 6,383,651); or

(b) CALLICOTT ET AL (US 6,423,418);

have been withdrawn in view of Applicant's amendments filed 4/5/2007 (establishing an effective filing date of 03/05/1998).

9. Claims 1-7, 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over: WO 99/450079 (WO '079).

Claims 1-7, 12-13 are rejected under 35 U.S.C. § 102(b) as being anticipated by WO '079 as stated above. However, in the event the claims are not anticipated, the claims are obvious for the following reasons:

The above reference discloses curable or cured coatings derived from compositions comprising an amino resin (e.g., alkyl-etherified melamine formaldehyde resin) and a polymer comprising polyester segments and fluorinated polyether segments, wherein the polyether segments are derived from oxetane with pendant fluorinated groups linked to the polyether segments via an ether linkage, substrates coated with said coatings, and methods of forming such coated substrates, wherein the substrate is polyvinyl chloride, the coated substrates are dry erase materials and/or wall coverings, and wherein curing takes place at 150 F or more. (WO '079, see entire document)

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the coatings disclosed in the above references to conventional substrates such as metals, plastics, polyvinyl chloride, etc. in order to form useful articles with stain resistant surfaces such as dry erase surfaces or wall coverings (claims 20-21). One of ordinary skill in

Application/Control Number: 10/774,187 Page 6

Art Unit: 1773

the art would have adjusted the curing conditions of the coating (claim 22) depending on the specific curing characteristics of a given coating formulation and the thermal stability or resistance of the substrate to be coated.

Response to Arguments

- 10. Applicant's arguments filed 4/5/2007 have been fully considered but they are not persuasive.
- (A) Applicant argues that claims 1-7, 12-13 are entitled to the priority date of 3/5/1998 because they are dependent on claim 8, which has an effective filing date of 3/5/1998. However, the effective priority date of a claim is dictated not solely by the effective priority date of the parent independent claim, but is determined individually for each and every claim; therefore, within a given claim, the presence of any claim language not fully supported by the priority documents affects the effective priority date of that specific claim. Because the relied upon priority documents Applications No. 09/384,464 and earlier filed Applications only disclose n values ranging from 1 to 3, the disclosure of those prior-filed applications (09/384,464 and earlier) fail to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. Since the earliest support for newly added recitation of "wherein n is an integer from 1 to 5" in claim 1 is present in Application No. 09/698,554, claims 1-7, 12-13 are deemed to have an effective filing date of 10/27/2000, which is the filing date of Application No. 09/698,554.

Application/Control Number: 10/774,187 Page 7

Art Unit: 1773

Allowable Subject Matter

11. Claims 8-11, 14-22 are allowable over the prior art of record.

12. The following is a statement of reasons for the indication of allowable subject matter: .

The prior art of record fails to disclose or suggest a coated laminate, said coating comprising the recited resin comprising polyester segments and the recited polyether segments derived from oxetane monomers containing the recited pendent fluorinated group and ether linking group, in combination with the recited melamine resin, and the recited method of making said laminate. Specifically, MALIK ET AL references fails to specifically disclose the formation of the recited fluorinated polyoxetane-containing polyester resins; the WEINERT ET AL and CALLICOTT ET AL references fail to disclose the polyoxetane-polyester block copolymers in combination with melamine resins; copending Application 10/267,061 fails to claim the recited fluorinated oxetane-containing polyesters; TANAKA ET AL (US 5,681,890) and QUINN ET AL (US 4,714,657) fail to disclose the recited fluorinated oxetane-containing polyesters.

Art Unit: 1773

Conclusion

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vivian Chen whose telephone number is (571) 272-1506. The examiner can normally be reached on Monday through Thursday from 8:30 AM to 6 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney, can be reached on (571) 272-1284. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

The General Information telephone number for Technology Center 1700 is (571) 272-1700.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
